New e-book helps you discover—and share—your unique gift with the world

As children, we are all born with unique gifts. As we grow, we become more socialized and we either get closer to our gifts, celebrate them, or disconnect from them. Your Unique Gift: Finding Your Life's Unique Gift Proposition (A Transformative Guide to Meaningful Freedom) by author and CEO Virginia Nava Hieger will help you to re-engage, reconnect and rediscover your unique gifts—and then determine how you'd most like to share them.

Through personal stories and journaling exercise, you'll learn deeper truths about:

The gift of life

Gift sensors

How to acknowledge the gifts in others

Gift synergy

How to share your gift

How to take meaningful action with your gift proposition

As a transformative guide, she believes each one of us has our own source of inner strength and that we simply need the tools to reconnect with it to let our light shine back out into the world. Taking the leap toward personal growth and transformation requires courage and self-reliance, and Virginia recognizes that we need to add meaning to our freedom, since freedom must take on a higher purpose.

"Freedom is the gift that we can share by being truthful and genuine; when we attach to it the ability to share it with others, we can truly leave a positive mark in the world, a creative legacy that can inspire others to do the same and make the world a better place for everyone," she says.
